| <b>Subject</b> | Directives on Stopping the Use of Nitrous Oxide Immediately in all Private Sector Dental Practices in the State of Qatar   |
| <b>Date</b>    | August 7, 2022   |

### **Greetings from The Department of Healthcare Professions (DHP) at (MoPH)**

As part of the efforts of the Department of Healthcare Professions (DHP) to ensure the efficiency and eligibility of all health practitioners working in the private sector in the State of Qatar, and to ensure the safety of patients in a manner that does not conflict with the quality of health services provided, it was decided at the seventh meeting of the Standing Committee for Licenses held on: 2022/03/28 to stop the use of laughing gas (Nitrous Oxide) immediately in all private sector health practices in the country. Based on the above, the Department of Healthcare Professions (DHP) calls upon all health facilities/health practitioners to comply with the above directives affirming that non-compliance with this decision will lead to legal action against violators.

**Thank you for your cooperation,**
